## Introduction

This document describes integration with Google as the identity provider.

For information on configuring Google for SAML SSO, refer to the following articles.

<https://support.google.com/a/answer/6087519>

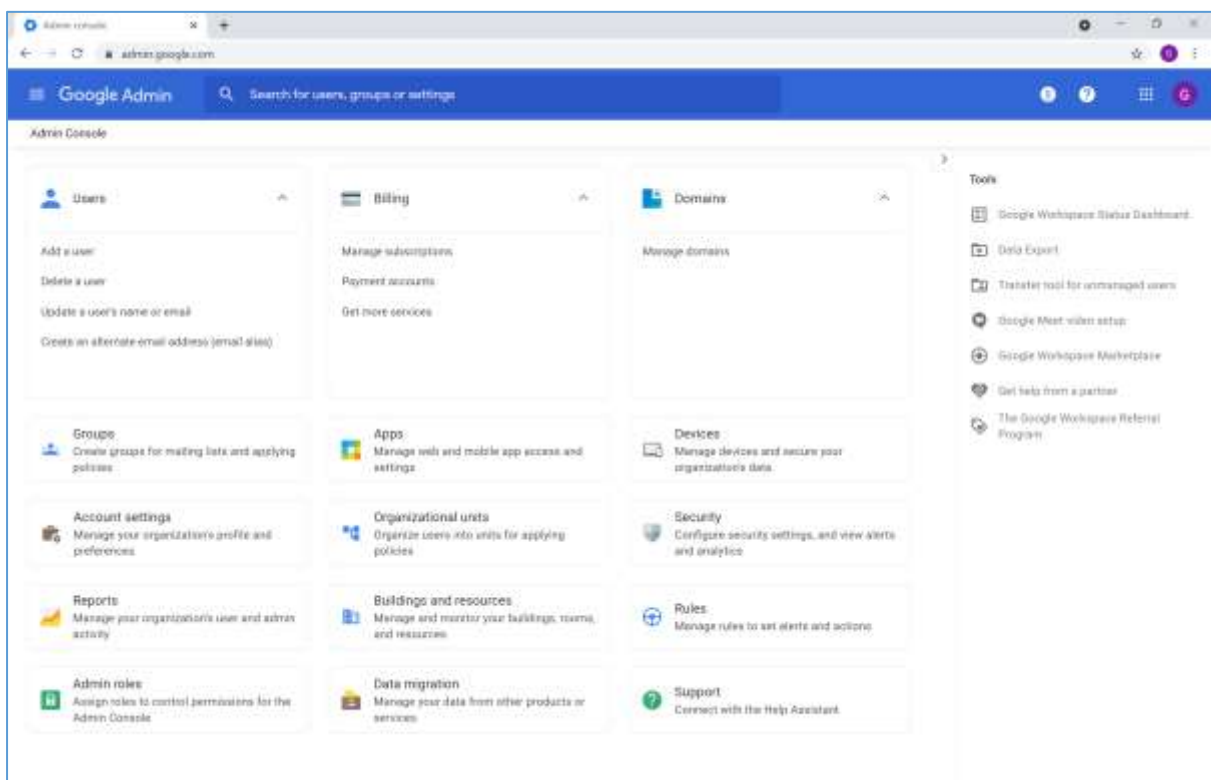

<https://support.google.com/a/answer/2463723>

## Adding a SAML Application

Log into Google as an administrator.

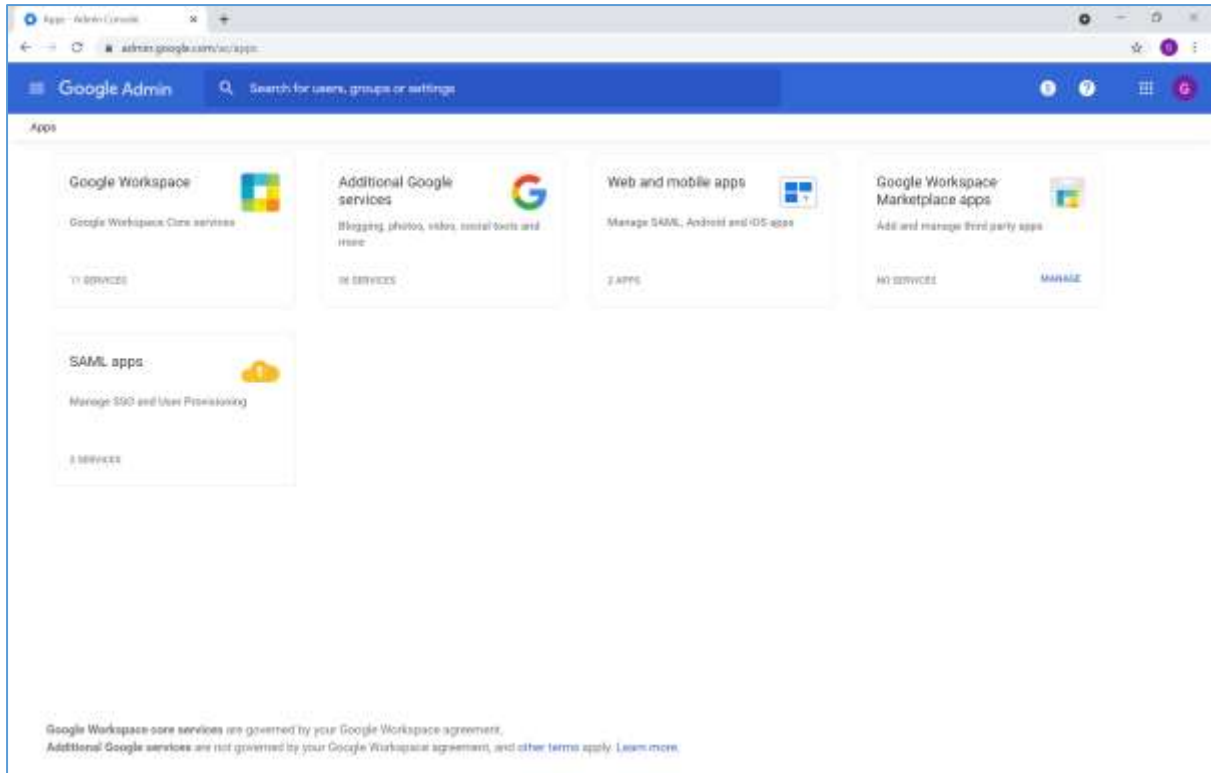

<https://admin.google.com/>

Select Apps.

Select SAML apps.

## ComponentSpace SAML for ASP.NET Google Identity Provider Integration Guide

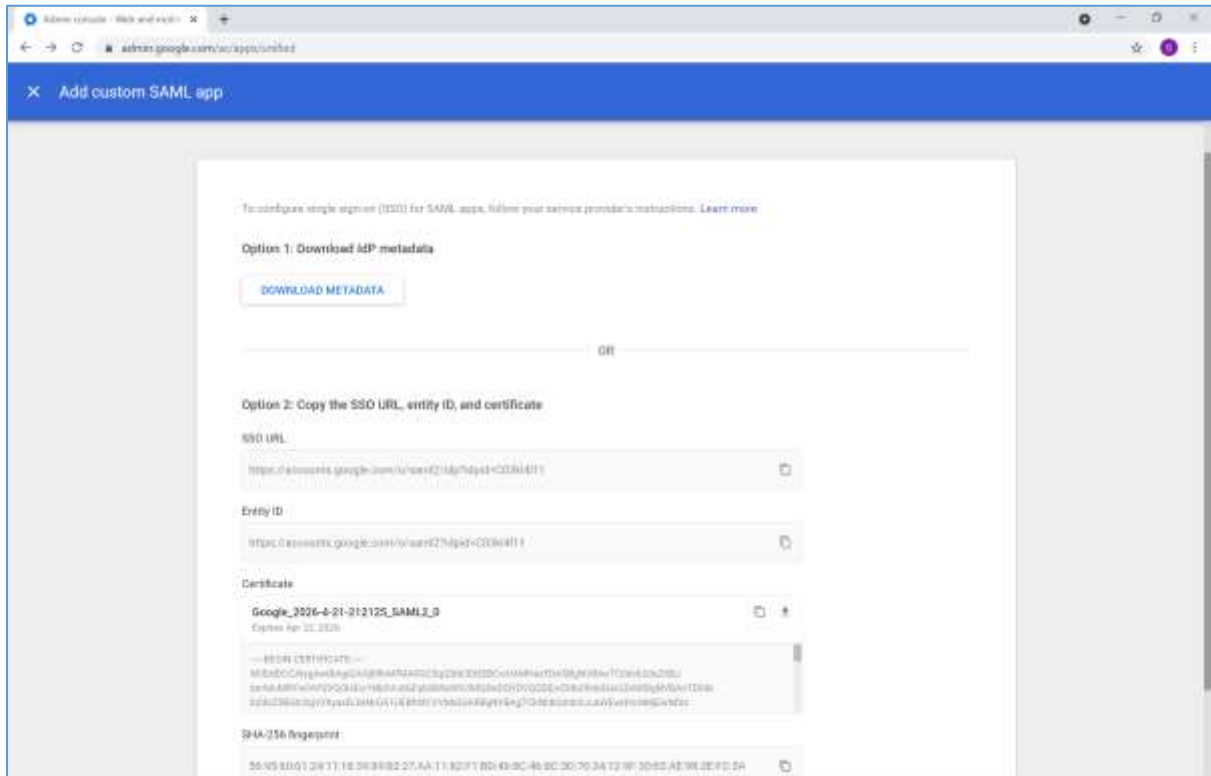

Click Add App > Add custom SAML app.

Specify an application name. This is for display purposes only.

## ComponentSpace SAML for ASP.NET Google Identity Provider Integration Guide

Download the IdP metadata or take note of the configuration settings. This is used to configure the service provider.

Specify the service provider details.

The assertion consumer service URL is where the SAML response is received.

For example:

<https://127.0.0.1:44360/SAML/AssertionConsumerService>

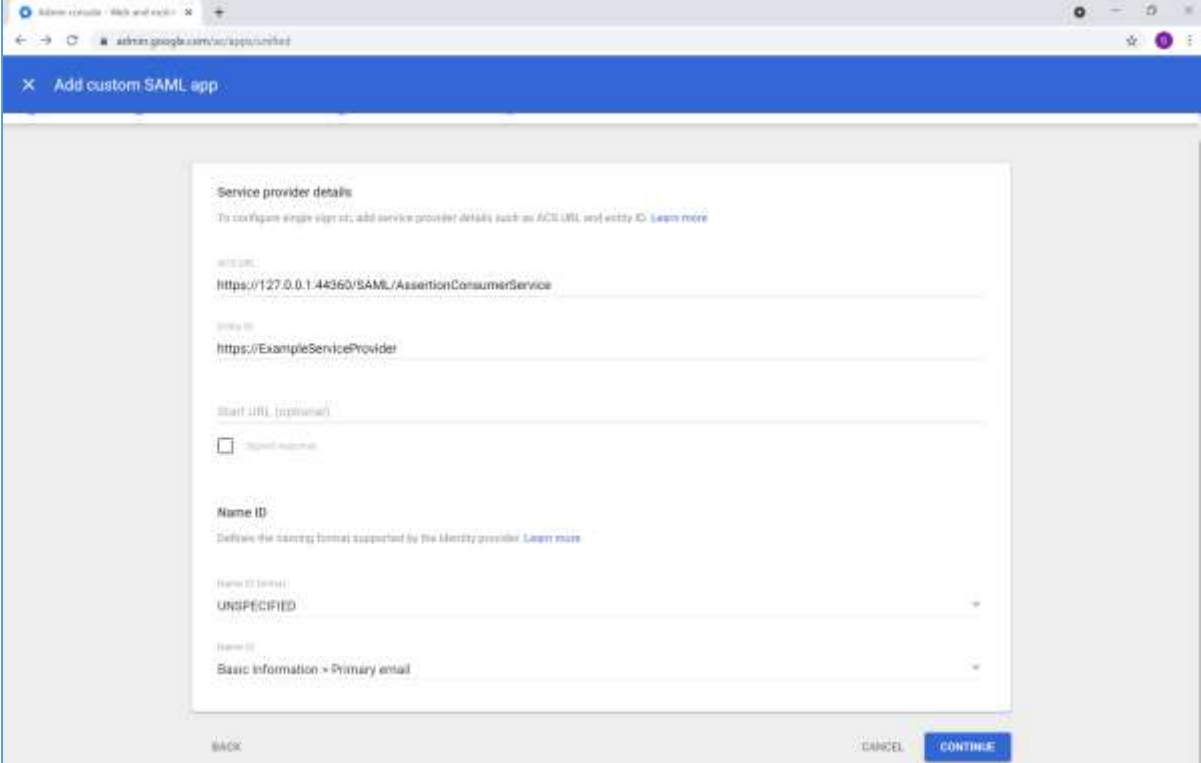

Note that Google doesn't permit localhost URLs.

The entity ID is the service provider name.

For example:

<https://ExampleServiceProvider>

The screenshot shows the 'Add custom SAML app' wizard in the Admin console. The current step is 'Service provider details'. The form contains the following fields:

- ACS URL:** `https://127.0.0.1:44360/SAML/AssertionConsumerService`
- Entity ID:** `https://ExampleServiceProvider`
- Start URL (optional):**  `Ignore`
- Name ID:** `UNSPECIFIED`
- Name ID format:** `Basic Information > Primary email`

Buttons at the bottom: BACK, CANCEL, CONTINUE.

Attribute mappings may be specified if required.

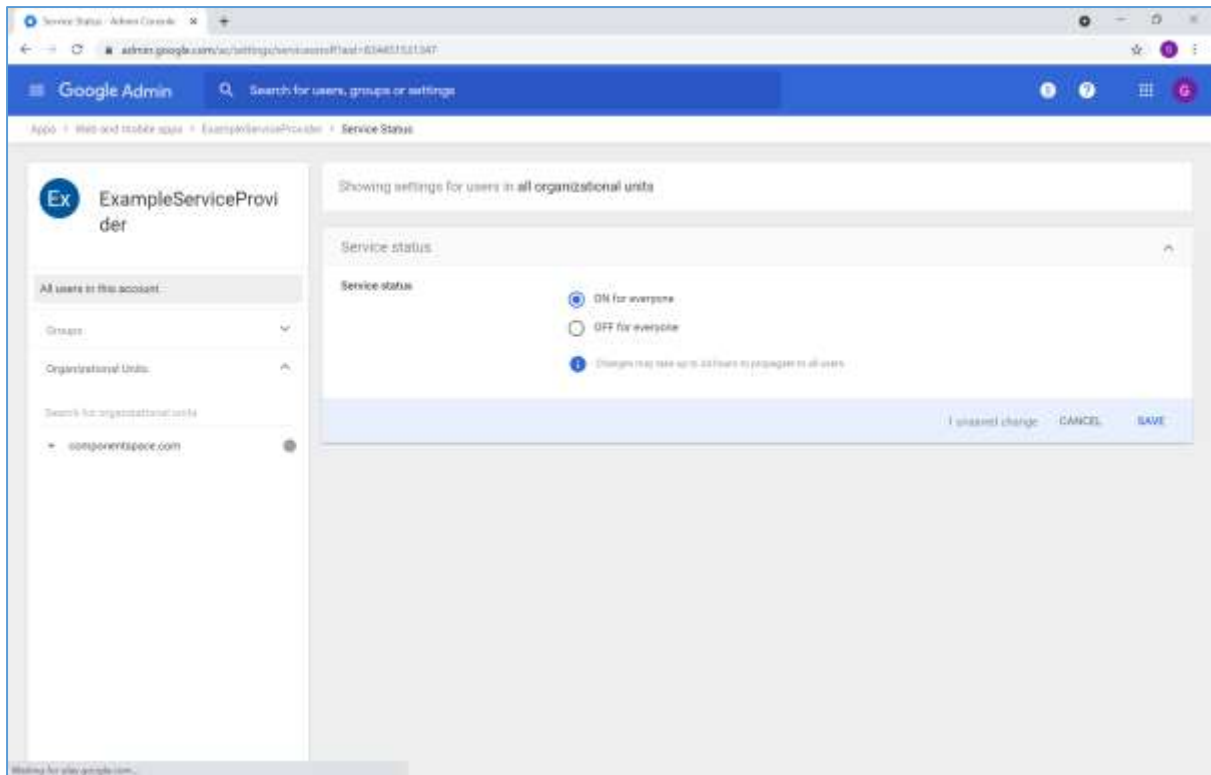

The screenshot shows the 'Add custom SAML app' wizard in the Admin console. The current step is 'Attribute mapping'. The form contains the following fields:

- Google Directory attributes:** (empty list)
- App attributes:** (empty list)

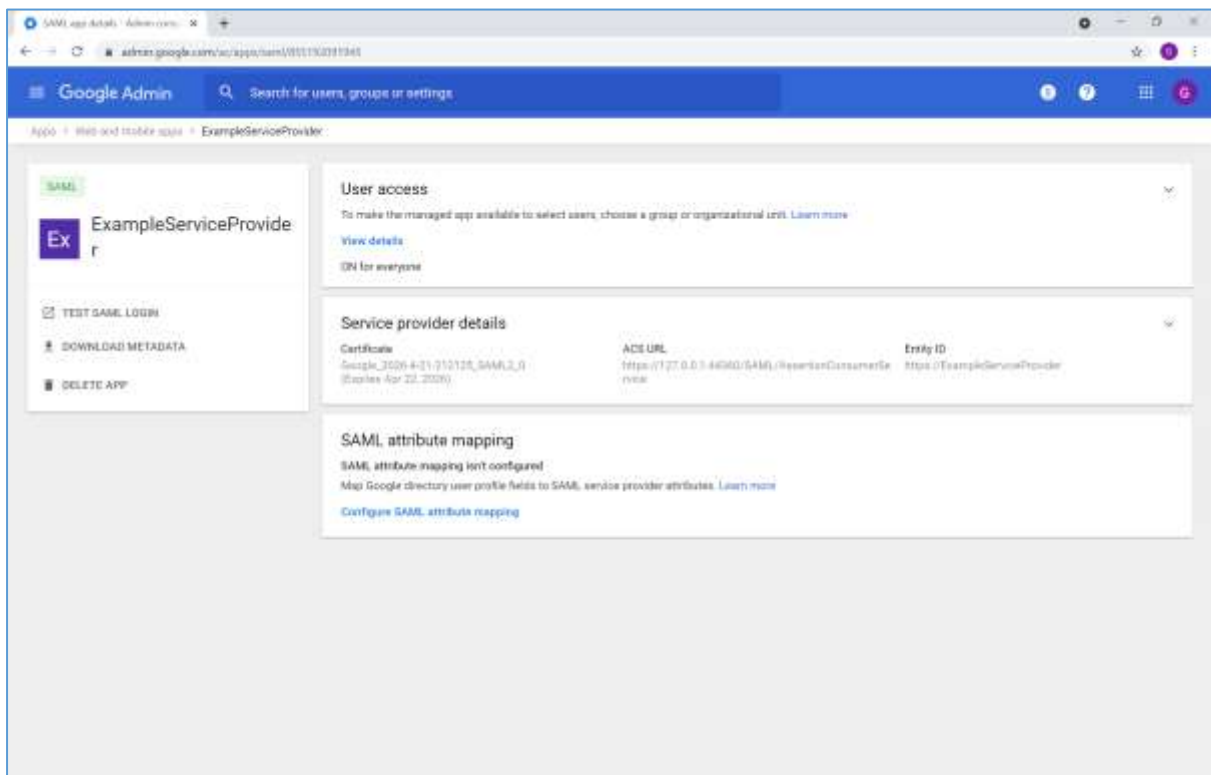

Buttons at the bottom: BACK, CANCEL, FINISH.

Ensure the application is turned on for everyone.

## ComponentSpace SAML for ASP.NET Google Identity Provider Integration Guide

The SAML configuration is complete.

## Service Provider Configuration

The following partner identity provider configuration is included in the example service provider's SAML configuration.

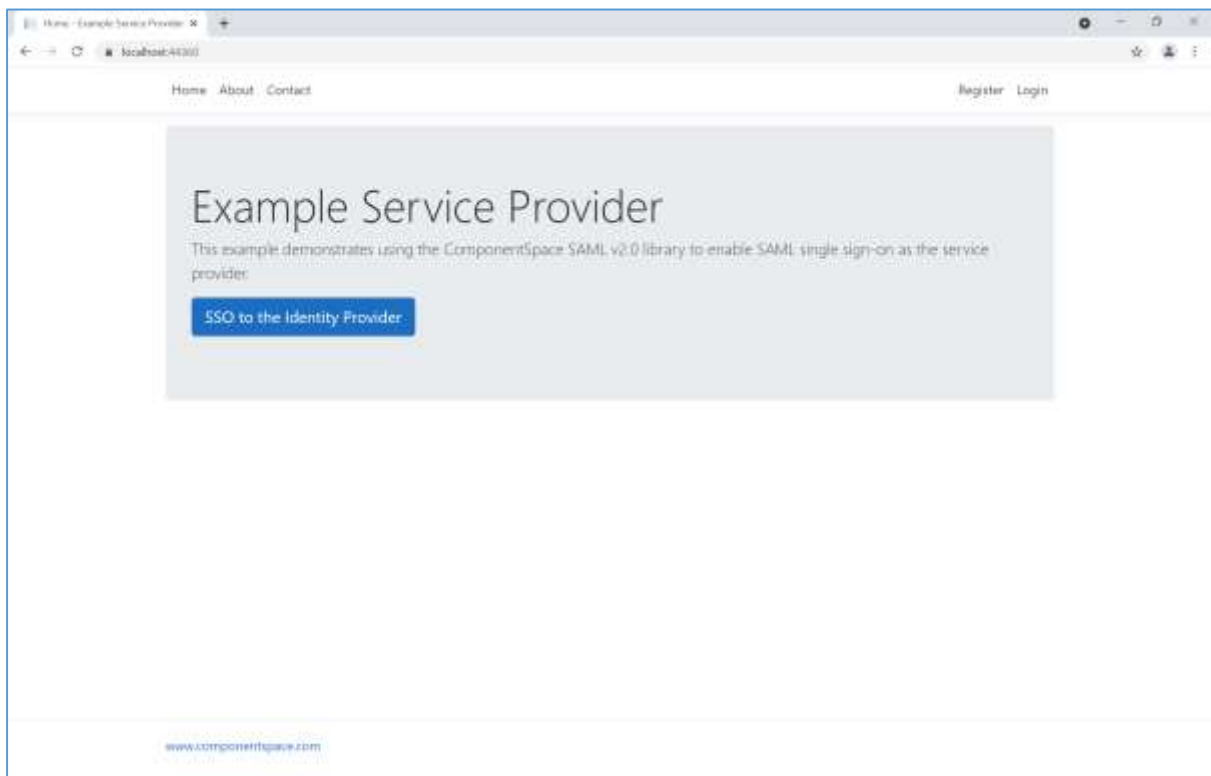

```
<PartnerIdentityProvider
  Name="https://accounts.google.com/o/saml2?idpid=C03kl4l11"
  Description="Google"
  SingleSignOnServiceUrl="https://accounts.google.com/o/saml2/idp?idpid=C03kl4l11">
  <PartnerCertificates>
    <Certificate FileName="Certificates\google.cer"/>
  </PartnerCertificates>
</PartnerIdentityProvider>
```

Ensure the PartnerName specifies the correct partner identity provider.

```
<add key="PartnerIdP" value="https://accounts.google.com/o/saml2?idpid=C03kl4l11"/>
```

## SP-Initiated SSO

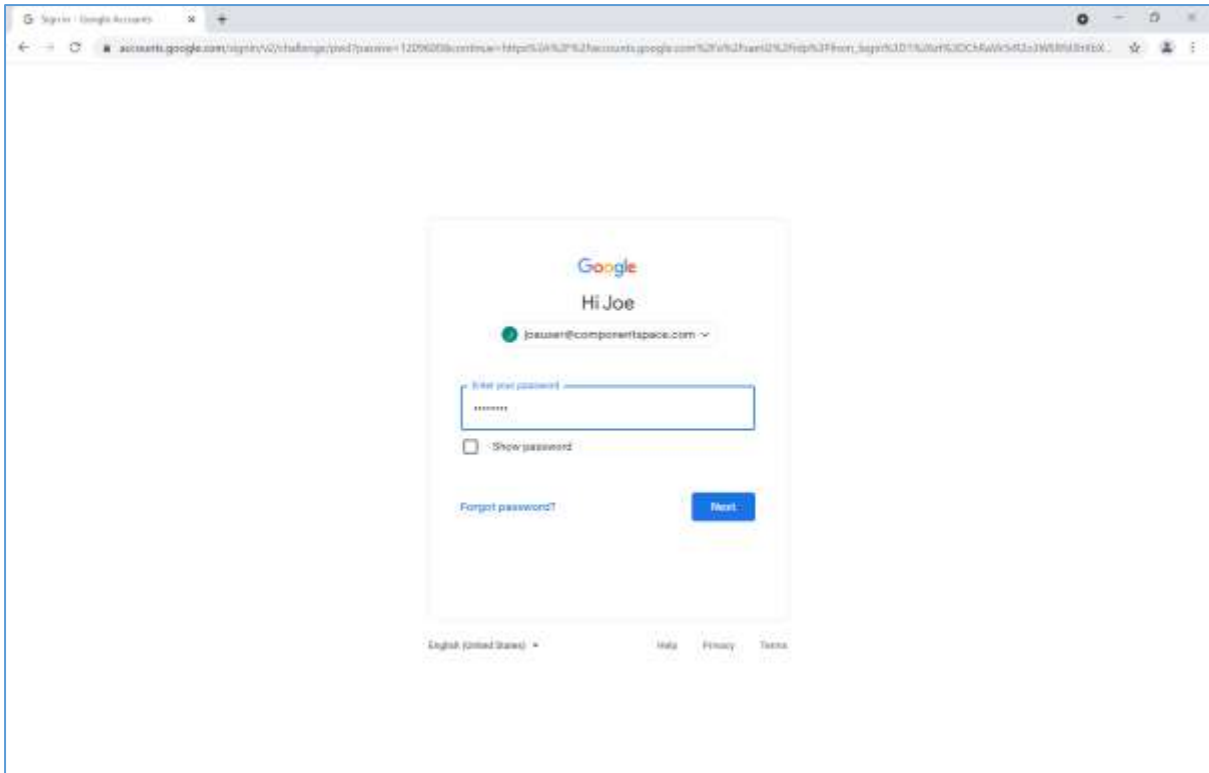

Browse to the example service provider and click the button to SSO to the identity provider.

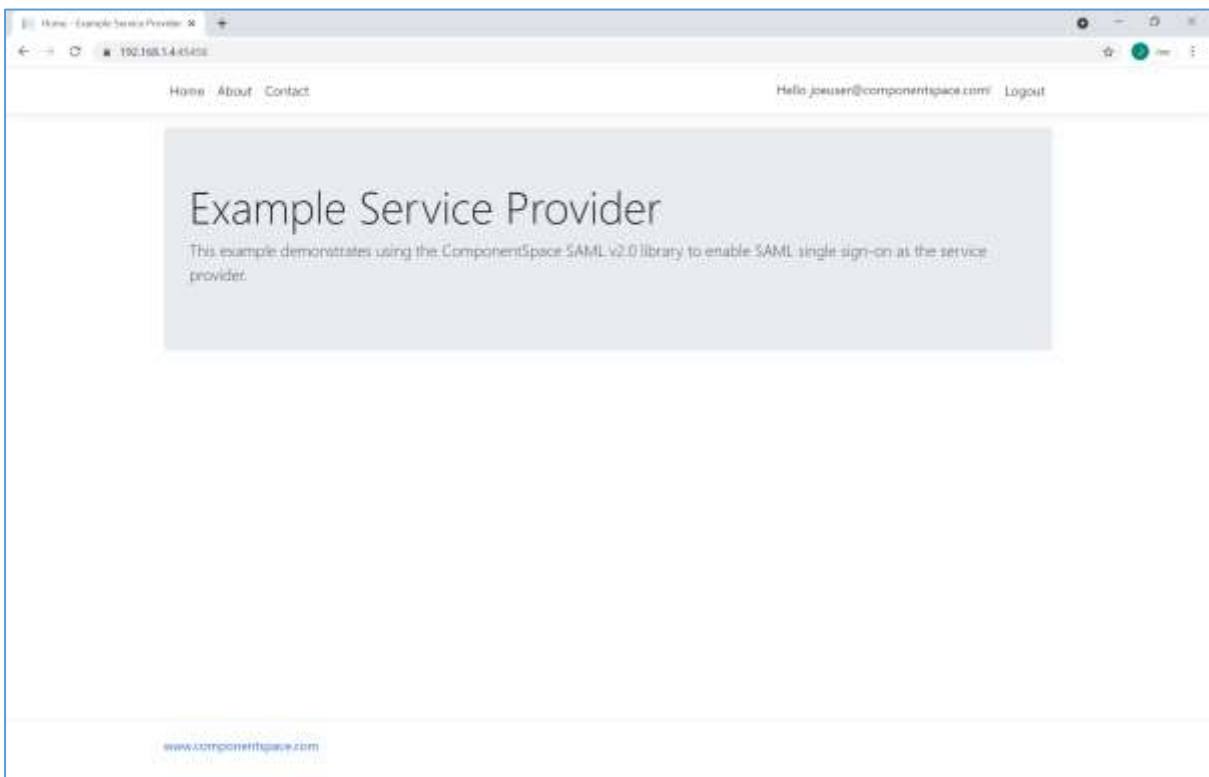

Log into Google.

## ComponentSpace SAML for ASP.NET Google Identity Provider Integration Guide

The user is automatically logged in at the service provider.

### IdP-Initiated SSO

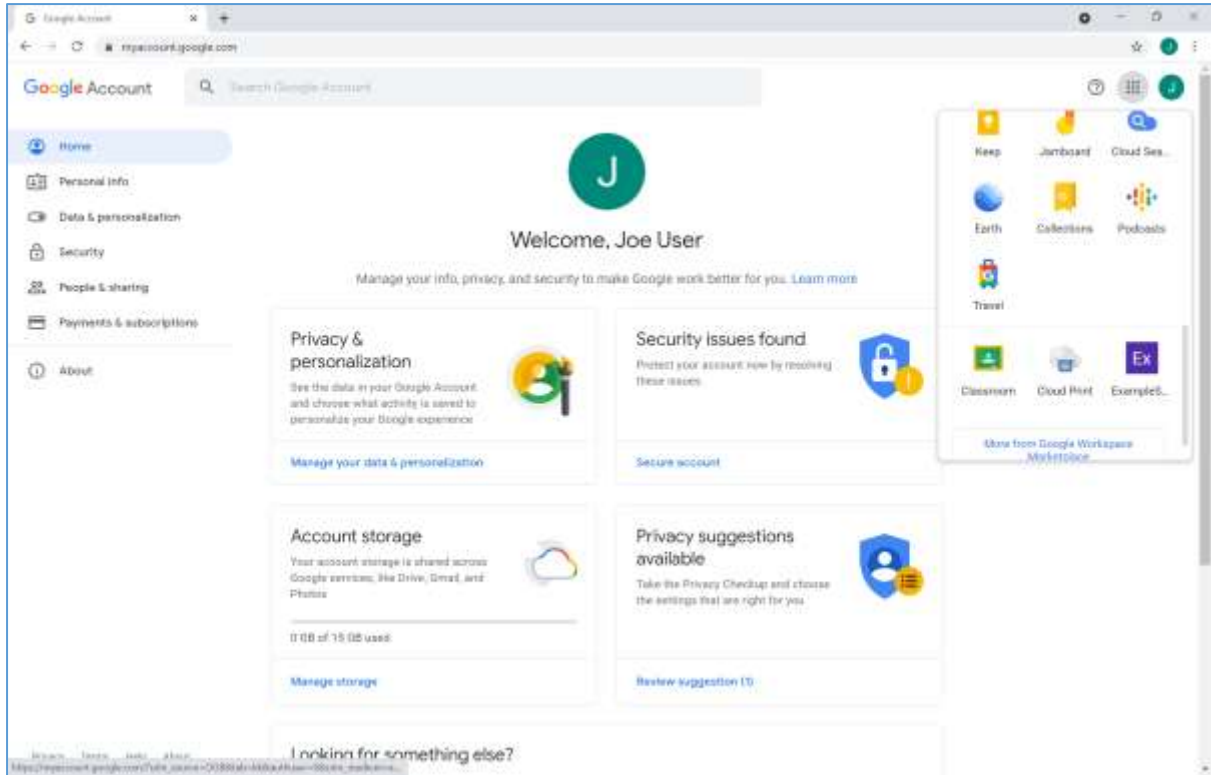

Browse to Google and login.

For example:

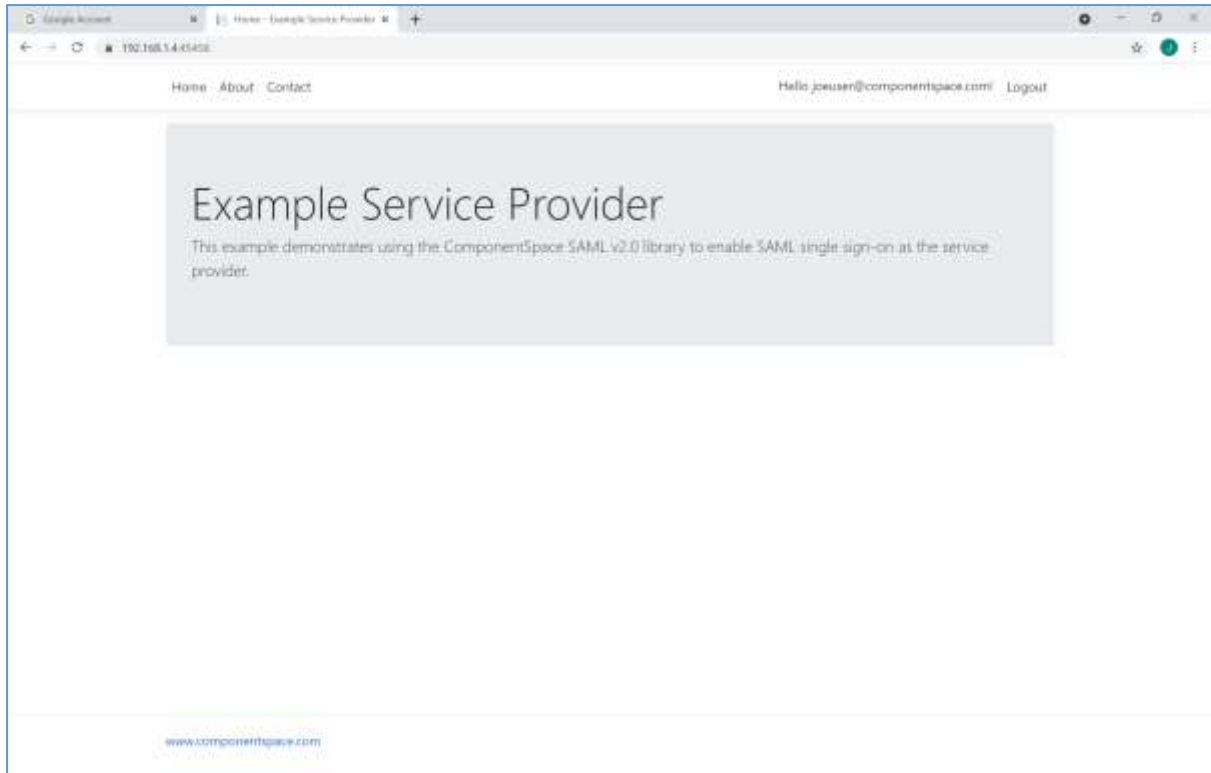

<https://myaccount.google.com>

Click the Apps button to show the applications.

Select the example service provider.

The user is automatically logged in at the service provider.

## SAML Logout

Google doesn't support SAML logout.
